Lab Exercise: LaTeX

Samir Suthar

University of Utah,

Physics & Astronomy Dept.

(Dated: March 18, 2020)

I.   IN THE BEGINNING...

... there was light, and OH was it good!

II.   MATH AND EQUATIONS

$$\tan(\theta) = \mu/a \tag{1}$$

$$\alpha = \sqrt{\beta^2 + \Lambda^2} \tag{2}$$

$$w = y_2 x_{15} + z_1^{2/3} \tag{3}$$

$$\sigma^2 = \sum_{i=1}^{N} (x_i - \bar{x})^2 \tag{4}$$
$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \tag{5}$$

$$z = \lim_{y \to \infty} f(y) \tag{6}$$

FIG. 1: This is an arbitrary figure.
